Machine Learning Intern

Nimbus AI Labs, Pune, India

About the Role

Nimbus AI Labs is looking for a Machine Learning Intern to join our applied data team for a six month internship. You will work with senior engineers to clean data, build predictive models and present findings to the product team.

Responsibilities

- Collect, clean and explore datasets using Python, Pandas and NumPy.
- Perform data analysis to find patterns and prepare features for machine learning models.
- Build and evaluate machine learning models using Scikit-learn.
- Write SQL queries to extract data from relational databases.
- Work on simple NLP tasks such as text classification and information extraction.
- Use Git for version control and collaborate through code reviews.

Required Skills

Python, Machine Learning, Data Analysis, Pandas, NumPy, Scikit-learn, SQL, Natural Language Processing (NLP), Git.

Eligibility

Final year students or recent graduates in Computer Science, Information Technology or a related field, with good communication skills and a strong interest in learning.
