MEERA JOSHI

meera.joshi@example.com | +91 97654 11223 | https://github.com/meerajoshi
Pune, Maharashtra

SUMMARY

Computer vision enthusiast interested in image recognition and deep learning. Has built convolutional neural networks for classification and object detection.

EDUCATION

B.E. in Electronics and Telecommunication, College of Engineering Pune, 2021 - 2025

SKILLS

Computer Vision, Deep Learning, Machine Learning, Python, OpenCV, TensorFlow, Keras, NumPy, CNN, Git

EXPERIENCE

Computer Vision Intern, VisionWorks AI, Pune, Jun 2024 - Sep 2024

- Trained convolutional neural networks with TensorFlow and Keras to classify product images.
- Used OpenCV for image preprocessing, augmentation and object detection.
- Improved model accuracy through hyperparameter tuning and data augmentation.
- Managed project code and model versions using Git.

PROJECTS

- Traffic Sign Recognition: a CNN built in Python that classifies road signs from camera images.
- Face Mask Detection: real-time detection system using OpenCV and deep learning.
